FOREWORD

THE 29th edition of THE WORLD OF LEARNING contains new material throughout the book, particularly in the field of librarianship; the section on libraries in the U.S.S.R. has been completely revised and enlarged, and many more library associations have been included. There are details of several new universities, and entries for the institutions of higher education reopened in China.

We have once again tried to ensure that we include the latest possible information concerning entries in THE WORLD OF LEARNING. Every year a folder containing the previous year's proof is sent to each entry; continuous research in the world press and educational journals, as well as contact with official sources all over the world, supplements this method of revision. We welcome information and suggestions from users of the book, concerning either existing entries or possible new material.

We are always grateful to those individuals and organizations who help us to bring our information up to date with their prompt replies. We particularly emphasize the necessity for revised entries to be returned to us without delay, since important material may otherwise be held over until a later edition. Only by maintaining a strict timetable can the regular production of such a large work as THE WORLD OF LEARNING be assured.

THE BRITISH COUNCIL

10 SPRING GARDENS, LONDON, SW1A 2BN

Established November 1934;
incorporated by Royal Charter 1940.

ORGANIZATION

The principal purposes of the British Council are the promotion of a wider knowledge of Britain and the English language abroad and the development of closer cultural relations with other countries. Its estimated expenditure for 1978–79 is £93.9m., 81 per cent of which is provided out of public funds.

The Council is governed by a board of up to 30 members, six of whom are nominated by Ministers. The Chairman is Sir CHARLES TROUGHTON, C.B.E., M.C., T.D. There are advisory committees for Scotland and Wales, and also advisory committees or panels for the main branches of the Council's work. The Director-General is Sir JOHN LLEWELLYN, K.C.M.G., PH.D., D.SC., F.R.S.(N.Z.).

There are offices of the Council in the following Commonwealth countries: Australia, Bangladesh, Canada, Cyprus, Ghana, India, Kenya, Malawi, Malaysia, New Zealand, Nigeria, Sierra Leone, Singapore, Sri Lanka, Tanzania, Zambia, Lesotho (with Botswana and Swaziland), Hong Kong, Malta, Mauritius; and in the following foreign countries: Afghanistan, Algeria, Argentina, Austria, Bahrain, Qatar and United Arab Emirates, Belgium (with Luxembourg), Brazil, Cameroon, Chile, Colombia, Denmark, Egypt, Ethiopia, Finland, France, Federal Republic of Germany, Greece, Indonesia, Iran, Iraq, Israel, Italy, Japan, Jordan, Republic of Korea, Kuwait, Lebanon, Mexico, Morocco, Nepal, Netherlands, Norway, Oman, Pakistan, Peru, Poland, Portugal, Saudi Arabia, Senegal (with Mali and Mauritania), South Africa, Spain, Sudan, Sweden, Syria, Thailand, Tunisia, Turkey, Venezuela, Yemen Arab Republic, Yugoslavia and Zaire; the Cultural Attachés at the British Embassies in Czechoslovakia, Hungary and Romania, the Assistant Cultural Attaché at the British Embassy in the Soviet Union, and the Educational Attachés at the British Embassy in Washington (U.S.A.) are appointed by the British Council.

ACTIVITIES

Educational work is one of the Council's most important tasks. The fields of English language teaching and science have been important for many years while more recently the Council has strengthened its expertise and international collaboration in such areas as educational technology, schools and teacher education, science and mathematics education, and further and higher education. Assistance and advice is provided in the introduction of new methods, materials and techniques in both the formal and non-formal sectors of education. The emphasis is on the training of teachers and teacher-trainers, and the Council co-operates with overseas governments by maintaining English Language officers overseas and by seconding or recruiting staff for key posts. Further support for English teaching is provided by work in radio and television. There is similar support, on a smaller scale, for science education, and of the lecturers supplied for summer schools and short courses for teachers overseas about a quarter are science and mathematics specialists. In some countries the Council is engaged in direct English teaching, particularly to specialist professional groups, is involved in material preparation, and directs centres for British examinations in English. It recruits educational advisers to Ministries, teachers of English, science and other subjects for schools, colleges and universities. The Council operates a variety of schemes geared to meet the needs of academic interchange with other countries. It also maintains officers in an increasing number of countries to promote liaison with British scientists and to provide information on British science, medicine and technology. It sends overseas specialists in a wide range of subjects to lecture, advise and consult.

In many of these activities the Council co-operates closely with the Ministry of Overseas Development and other organizations. Headquarters support for the overseas activities includes several units within the Education and Science Division which meet specific requests as well as disseminating information through leaflets, other publications and study kits. English language teaching activities are supported by the English Language Division in London, which has a team of specialist advisers, maintains a specialist library providing bibliographical and other information, and carries out developmental projects in the teaching and learning of English. Training courses in the production of educational radio and television programmes as well as audio-visual aids are conducted for overseas trainees in the Council's training complex in Tavistock House.

The Council aims to promote a wider knowledge and appreciation of British scholarship and achievements in the literary, visual, and performing arts. Writers, ballet soloists and other specialists are invited to perform, lecture or teach overseas; tours by a wide range of musicians and theatre companies are organized or assisted; fine arts exhibitions and photographic displays are sent abroad; support is given to English studies; collections of documentary films are maintained in many overseas offices and in Headquarters the advice of specialist staff is available.

The Council runs or is associated with 170 libraries; as ODM's adviser and agent assists in the establishment or strengthening of public library systems in developing countries and operates their Books Presentation Programme and the English Language Book Society's Low Priced Books Scheme; promotes the use of British publications overseas by organizing exhibitions of books and periodicals.

The Council provides many services for overseas students in Britain. It arranges programmes of studies for professional people, and gives scholarships and other awards to overseas scholars and research workers to allow them to pursue their studies in Britain. It administers the awards for training in Britain under the technical co-operation programme, and is also responsible for administering in Britain most of the Fellowships schemes of the UN and UN Specialized Agencies and certain Council of Europe Higher Education Scholarships. It also administers jointly with the Association of Commonwealth Universities awards offered under the Commonwealth Scholarship and Fellowship Plan. Increasingly, the Council acts as agent for training schemes in Britain financed by overseas governments or international bodies. It finances Youth Exchange programmes with many countries; and it also organizes short courses and summer schools in Britain on a variety of educational and other subjects.
